

IRISNDT has been serving the oil, gas petrochemical, and manufacturing industries since 1953.

Acquisitions of Matrix Inspection & Engineering (US & UK), Pangea Engineering, Coraspec Systems and SPI NDT in the UK have enabled us to expand and diversify our services into a wide range of specialized Non-destructive Testing services, Materials Engineering, Life Expectancy Analysis and Asset Integrity Management. The acquisition of Thermal Technologies Inc. (TTI) in the US adds Heat Treating services to our arsenal with Heat Treating in Canada provided by IRIS Thermal Technologies.

This diverse group is fully integrated within the IRISNDT corporate umbrella resulting in significant efficiency benefits that result from having access to the strength of IRISNDT Quality, Safety and Policy Management systems.

Canadian operations are serviced from Edmonton, Nisku, Calgary, Lloydminster, Cold Lake, Fort McMurray, Barrhead, and Red Deer, Alberta.

US operations are serviced from Deer Park, Texas City, Houston, Corpus Christi, Beaumont Texas, New Orleans Louisiana, Charlotte NC, Denver Colorado, Chicago Illinois and Claremore and Tulsa, Oklahoma. In England the UK and Europe are serviced from Stockton-on-Tees and Grimsby.

The IRISNDT group is one of the largest independent NDT and Materials Engineering service companies in North America and we continue to grow in the UK and Europe. We have aggressively expanded our business from standard NDT services to include highly advanced NDT technologies, Asset Integrity Management, Risk Based Inspection, Fitness for Service, Piping System and Process analysis, Materials Engineering, Integrity Software Development and Data Management. Complimenting this package in both North America and the UK is our state of the art Heat Treating services.

RBI, FFS and in depth materials engineering and metallurgical and laboratory services are provided by the IRISNDT Engineering division. Coraspec Systems provides software development for integrity management with the Maxi-trak software package. Highly specialized advanced NDT services such as Automated Ultrasonic examination, Phased Array, Acoustic Emission, Long Range Guided Wave Ultrasonic Examination, ACFM, Visual (API, CWB) and Tank Inspections are provided by IRISNDT (Canada), SPI (UK) and IRISNDTMATRIX (US).

We continue to provide a full array of standard NDT services such as Radiography, MPI, LPI, Ultrasonics, PMI, Hardness and Ferrite Testing at all locations in North America and the UK.

We provide Heat Treating services throughout North America and in the UK and our highly trained technicians are supported with a full array of mobile equipment allowing us to respond quickly to all your Heat Treating needs whether at a fabrication facility or in the field.

Within IRISNDT family safety is key and we are proud of our safety performance and record but never forget it requires continuous commitment to maintain. We have held an ACSA Partnership in Health and Safety Certificate of Recognition since 1995 and are registered and "approved" by CanQual and ComplyWorks in Canada as well as ISNET World and PICS Auditing in both Canada and the US.

Our Quality system enables us to assure that procedures and technical standards current, up to date and are always easily accessible to our Technicians, Inspectors, Engineers and support staff.

IRISNDT has adopted a simple culture "Take Care Of Your Customers and Take Care Of Your People". We are committed to this philosophy and continuously work hard to live by it. Our success has been built on credibility and reputation, which can only be achieved by retaining long-term customers and reliable highly trained, committed and happy employees we never forget "Our product is our people".
