

## NOTES:

- 1) Use either  $\pm 10V$  from Pandora PID project or the 24VDC wall wart but not both.
- 2) Supplies  $\pm 10V$  with no common is intentional, coax shield does this.
- 3) REF: with +24.0V measured 17mA and  $\pm 11V \pm 0.15V$ .
