

IRC3 Sensor Card

This IR sensor card provides a low cost alternative to laser beam finders and beam profile instruments by providing the user with an instant visible pattern for determining beam location and approximate beam size.

Features

- Card Size: 2.25" x 1.5"
- Sensor Area: 1.50" x 0.75"

IR Viewing Card Specifications

Part #	ER [®] Phospor	Peak Emission Wavelength nm / color	IR Wavelength Range	Approx. Min IR Intensity (Dark)	Approx. Min IR Intensity (Room Light)	Pump Wavelength	Resolution (typical)
IRC3	Q-11	625 / orange	0.7 - 1.4	12 μ W/cm ²	500 μ W/cm ²	visible....UV	3 Lp/mm
